

# AS PLUS

SHORT TERMS  
REALISATION

The window is dedicated to the group of customers who try to balance the expenditure on windows, while obtaining the maximum good thermal insulation parameters.

GUARANTEE

60 months

Deeply built-in profiles - 85 mm and a six-chamber system allowed to obtain the desired parameter on the market for the use of frame and sash at the level of  $U_f=1,1 \text{ W/m}^2\text{K}$ . By using a 24 mm Planitherm One 1.0 package and warm frames we achieve a window coefficient of  $U_w \Rightarrow 1.1 \text{ W/m}^2\text{K}$  which meets current construction requirements. In addition, we can optionally equip this product with a glazing package with  $U_g = 0.5 \text{ W/m}^2\text{K}$  (three panes) and then obtain for the window a result in the vicinity of  $U_w = 0.8 \text{ W/m}^2\text{K}$  which puts it in an excellent place in terms of parameters, but also a very attractive price.

FULFILLS CURRENT  
BUILDING  
REGULATIONS

$U_w 1,1 \text{ W/m}^2\text{K}$

This is a proven system that meets all the requirements for joinery on the construction market. In this window we use Siegenia Favorit fitting. Of course there is a possibility to retrofit AS PLUS window with the most modern fitting on the market - Siegenia Tytan AF in order to increase window functionality and its anti-burglary advantages.

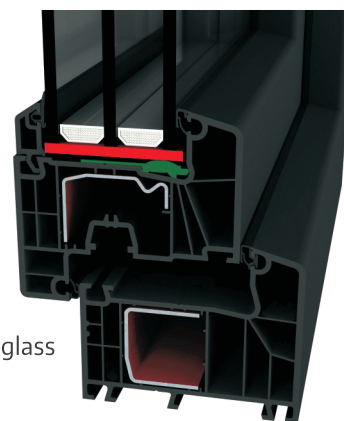

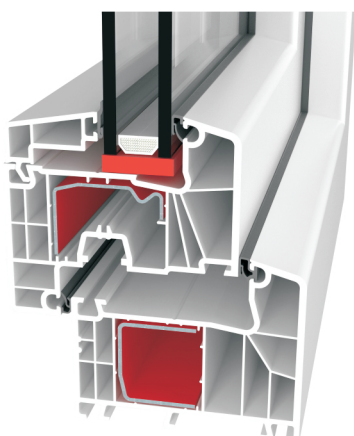

WIDE PROFILE

85 mm / 6 chambers

Fast delivery times in four standard colours and classic profile design as well as the possibility to configure a thermally insulated window based on the AS PLUS system make this window one of the most frequently selected products in new construction, both single- and multi-family.

OPTION - 3 GLASS
